

ISMS Audit Workshop

ISO 27001 is the recognised standard to manage information security in an organisation. This workshop trains both internal and external auditors to review and check correct implementation of an ISMS. The course teaches requirements on certification process (ISO 27006) and means to audit internally (inspired by potentially upcoming standing like ISO 27007 Guidelines for ISMS auditing and ISO 27008 Guidelines for auditors on information security controls). It starts by explaining basics on audit (ISO 19011, ISO 17021, audit techniques and audit principles) and includes practical trainings and exercises.

During the last afternoon, we propose a written knowledge test allowing to check if the participant acquired the competences to perform ISMS audits.

General information

Location	itrust consulting, Foetz, Luxembourg
Date, duration	3 days: -13-15 September 2011 -22-24 November 2011
Trainer(s)	Carlo Harpes, PhD , has more than 5 years experience as Senior Security Consultant. He was previously Manager and Trainer at Telindus PSF (previously CF6). For 8 years, Carlo Harpes was Deputy Director and Head of Information Security Department at Cetrel S.C. Carlo Harpes is ISO 20000 certified auditor, ISO 27001 auditor for SNCH and PKI technical auditor for ILNAS. He is an expert in Information Security involved in education, R&D and standardisation (University of Luxembourg, ISO, CLUSSIL, CNPD, FP7, Celtic, ESA etc...).
Language	English
Attendee profile	-Internal and external auditor that have to audit an ISO 27001 ISMS -ISMS implementator preparing for an external audit -Security officer in charge of monitoring and controlling security

Learning outcomes:

After a successful completion of this course, the participant should be able to:

- List typical tasks and processes of an information security manager
- Understand auditor requirements like impartiality, competence, responsibility, openness, confidentiality and responsiveness to complaints
- Explain the standard approach to audit an ISMS (ISO 27006) by heart
- Debate compliance with security controls (ISO 27001 Annexe A)
- Recognise ways to collect evidence for compliance or non compliance on any security control
- Use technical documents and ISO standards to plan and perform an audit
- Assess criticality on non compliances and propose improvements
