System and security administrator (m/f)

Context

itrust consulting, innovative company in the area of IT security, performs its missions related to consulting, audit, research and training thanks to a team of 20 dynamic security consultants and IT engineers. itrust consulting is searching to recruit an UNIX System Administrator in order to strengthen its ICT team that works either for internal company purposes, or in direct contact with business partners.

Tasks :

- To contribute to the design, configuration, support and maintenance of an UNIX System and applications systems for surveillance of essential services;
- To administer such a platform;
- To manage a test environment and to test cyber protection tools;
- To document the work done in English language within a research project;
- To perform technical and security and technical audit of similar infrastructure, for itrust consulting's customers.

Profile of the candidate

- Owner of a Master's degree in Computer Science or similar;
- 2 years of professional experience in UNIX System administration, ideally on Solaris;
- Other admin skills such as Oracle, Firewall, applications are considered an advantage;
- High sense of responsibility regarding supporting essential service providers;
- German or Luxembourgish languages are considered as an advantage;
- Knowledge on Audit methods (ISO 19011, 27008…);
- Knowledge in security engineering and information security management.
